Message from the Guest Editor

Evidence-based practice allows us to provide reproducible results and provide patients with high-quality evidence-based care.

Clinical studies of our current practice, and clinical studies of how to tackle the challenges of the future, are paramount to further enhance our understanding and improve diagnostics and therapeutics in ophthalmology.

I am happy to invite you to consider this Special Issue for original research and review papers that deal with clinical aspects of ophthalmology. I welcome papers that deal with various aspects of diagnostics and therapeutics in ophthalmology.
