Message from the Guest Editors

Dear Colleagues,

Atherosclerosis affects millions of individuals worldwide, with a third of all deaths of Americans older than 35 being due to coronary artery disease, and stroke ranking 5th among all causes of death in the US. Despite available treatments, patient response rates are limited, and adverse drug reactions are considerable. The technological and scientific advances over recent years are setting the stage for new generations of atherosclerosis treatments that will be personalized and targeted at the cellular and molecular level. This Special Issue will be focusing on new technologies, concepts and strategies currently pursued towards these goals.

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM; ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, ‘omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) CiteScore - Q2 (*Medicine (miscellaneous)*)
