Message from the Guest Editor

In the last decade we have gained a deeper understanding of the underlying pathogenesis of various ocular disease, which has resulted in the development of novel effective targeted therapies such as teprotumumab for the treatment of active thyroid eye disease.

This Special Issues of *Journal of Personalized Medicine* aims to update the current evidence and collect the latest findings on various ocular disease.

Particular attention will be paid to original research articles, case reports, and state-of-the-art reviews to explore how to *overcome* the *challenges* and navigate the emerging therapeutic landscape.
