### Message from the Guest Editors

The integration of precision medicine into plastic and reconstructive surgery heralds a new era of clinical interventions, where surgical outcomes are optimized through a deeper understanding of individual patient profiles, enhancing both efficacy and safety.

The scope of this Special Issue encompasses a wide array of topics within the realm of precision medicine applications in plastic and reconstructive surgery, including but not limited to biomaterials and tissue engineering for personalized grafts and implants, the role of stem cells in tissue regeneration, the use of precision diagnostics for surgical planning, and the development of targeted therapies to enhance healing and reduce complications. We invite submissions of original research articles, review papers that synthesize current knowledge, methodological innovations that pave the way for future advancements, and case studies that highlight the practical applications and outcomes of personalized approaches in plastic and reconstructive surgery.

## Message from the Editor-in-Chief

*Journal of Personalized Medicine (JPM; ISSN 2075-4426)* is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, ‘omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, and other databases.

**Journal Rank:** JCR - Q2 (*Medicine, General & Internal*) CiteScore - Q2 (*Medicine (miscellaneous)*)
