Deadline for manuscript
submissions:

30 June 2024

Message from the Guest Editor

Dear Colleagues,

Chronic kidney disease is one of the most potent risk factors for end-stage kidney disease. The number of patients with chronic kidney disease is increasing. Although several new drugs have been launched in clinical practice, the global need for optimal strategies to prevent the progression of chronic kidney disease urgently needs to be addressed. This Special Issue of the *Journal of Personalized Medicine* aims to highlight the current state of the science and present the latest findings in the field of chronic kidney disease. We call for research that explores all conditions associated with chronic kidney disease, using basic science, clinical- and population-based approaches, and all kinds of actions for public awareness. Scientific advancements in the field of chronic kidney disease promise a brighter future for patients.

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM; ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, ‘omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) CiteScore - Q2 (*Medicine (miscellaneous)*)
