Deadline for manuscript
submissions:

closed (1 August 2023)

Message from the Guest Editors

Nerve lesions and pain and compression syndromes are often difficult to diagnose and treat due to the broad spectrum of pathologies and the high degree of specialization being required for optimal treatment. In line with this, the diagnosis and treatment of this spectrum remains an exciting multidisciplinary topic in both neuroscience and reconstructive surgery. We aim to publish articles describing novel personalized medicine approaches for the diagnosis and treatment of peripheral nerve lesions and nerve-related pain and compression syndromes.

Peripheral nerve surgery has been conducted for over a century, but the problem of correctly diagnosing the type of nerve lesion as well as overcoming slow nerve regeneration remains. Many novel techniques such as nerve transfers have been developed to solve these problems. Likewise, modern imaging methods have revolutionized the diagnosis of nerve pathologies.

We encourage the submission of basic science, translational science and clinical studies regarding peripheral nerve lesions and nerve-related pain and compression syndromes. Exciting case studies or series may also be published if they include a comprehensive review of the literature.

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM; ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, ‘omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) CiteScore - Q2 (*Medicine (miscellaneous)*)
