Message from the Guest Editors

The financial landscape of our global real estate economy is rapidly undergoing changes. These changes have been catalyzed, in part, by the COVID-19 pandemic, supply chain disruptions, high market volatility and uncertainty, corporations transitioning to remote workplace environments, and other forms of digital and global transformation, to name but a few. To broaden our understanding of some of these issues, this Call for Papers invites papers from a variety of disciplines that are both theoretical and/or empirical in nature. Topics of interest include, but are not limited to:

- Role of technology and digitalization and/or big data analytics in real estate;
- Securitization and financial engineering in real estate;
- Financial risk management and its application to real estate price dynamics;
- Housing shortages and mobility dynamics;
- Planning, construction, and/or other housing market risks;
- Housing and ownership characteristics across demographics;
- Financing and mortgage rates;
- The role of financial institutions in the global real estate economy;
- Diversification properties of real estate investments;
- Energy usage and efficiency analyses of property developments.

Deadline for manuscript
submissions:

31 August 2024

an Open Access Journal by MDPI
