Actuarial – Financial  
Mathematics, University of the  
Aegean, 83200 Island of Samos,  
Greece

### Message from the Guest Editors

In such an era, it becomes urgent to propose policies to address these complex situations, which threaten to hamper the prospects of the world economy. The academic community must be the spearhead of this attempt, and the present Special Issue aims to contribute in this direction. The findings of the negative effects since 2007 and the relative implications have an increasing importance a period of uncertainty.

The scope of this Special Issue is to host research works from the areas of economics, banking, finance, energy, corporate governance, engineering, sustainability and other related areas. Researchers who are interested in contributing in this direction are expected to address sophisticated econometric models and to propose policies to tackle market imbalances and distortions during the complex and unforeseen coming years.

Deadline for manuscript  
submissions:

**closed (1 October 2023)**

an Open Access Journal by MDPI
