Message from the Guest Editors

Dear Colleagues,

The financial crisis revealed severe problems with corporate governance. A number of recent challenges, such as the pandemic and inflation, introduced new issues to the realm of corporate governance and finance that society, governments, businesses, and individuals were not prepared for. This era of the “new normal” calls for evaluation of our previous strategies for addressing these challenges as well as discussions about how to deal with ongoing issues.

This Special Issue will focus on corporate finance and corporate governance issues faced in the “new normal”. We welcome empirical studies that discuss capital budgeting, capital financing, working capital management, board of directors, executive compensation, and any other aspect of business that our readers might find interesting.

Contributions that advance our understanding of ESG, equity, ethics, labour, stewardship, sustainability, and emerging technologies are especially welcome.

Dr. Feng Zhan
