Machine-Environment Interaction, Volume II

Guest Editors:

Dr. Manolo Dulva Hina
Department of Computer Science, ECE Paris School of Engineering (ECE Paris Ecole d'Ingénieurs), Paris, France

Prof. Dr. Amar Ramdane-Cherif
Département des Réseaux et des Télécommunications (RT), University Paris-Saclay, UVSQ - 12 Avenue de l'Europe, 78114 Vélizy, France
Deadline for manuscript submissions:
closed (30 January 2024)

Message from the Guest Editors

We would like to draw your attention to the *JSAN* Special Issue on "Machine–Environment Interaction". Extended versions of selected papers from the 3rd EAI International Conference on Computational Intelligence and Communications (CICom 2022), to be held in Australia on 28–29 December 2022 (https://cicom-conference.eai-conferences.org/2022/), will be considered for this Special Issue. In addition, we invite other researchers beyond CICom 2022 to submit papers on a topic within the field of machine–environment interaction, including its related fields which may include but are not limited to the following areas:

- Representation of the environment of an interactive system: models, formalisms;
- The perception of the environment of interactive systems;
- Data fusion and fission in interactive systems;
- Techniques and methods for optimization and learning to facilitate interaction;
- Reasoning in decision-making components of interactive systems;
- System for evaluation and analysis of interactive systems;
- Networks of sensors for interactive systems.

Special Issue

Editor-in-Chief

Message from the Editor-in-Chief

I encourage you to contribute research and comprehensive review articles for publication in Journal of Sensors and Actuator Networks (JSAN), an international, open access journal which provides an advanced forum for research findings in areas of sensors and actuators. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sensors and actuators and fostering applications of sensor-based measurements and effective actuator incorporation.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, ESCI (Web of Science), dblp, Inspec, and other databases.
Journal Rank: CiteScore - Q1 (*Control and Optimization*)
