Message from the Guest Editors

The Journal Land is excited to announce the special issue on “Digital Soil Mapping for Agri-environmental Management and sustainability”. The major focuses of this special issue are:

- Advanced techniques in soil mapping and monitoring
- High-resolution soil mapping for precision agriculture / precision conservation applications;
- Novel approaches in sampling, and prediction uncertainty assessment;
- Remote sensing/proximal soil sensing, and UAVs for high resolution soil mapping;
- Soil functional mapping, monitoring, and mapping dynamic soil properties;
- Interpretations and utilization of DSM products for informed decisions;
- Risk assessment and cost-benefit analysis for farm management decisions

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.
