Message from the Guest Editors

Borderland synergies have reached unprecedented levels in the last few years due to their potential for regional integration and role in supranational processes, i.e., infrastructure construction and planning activities on European territories (among other). Although cross-border cooperation experiences have grown in Europe and worldwide, generating a global network of relationships is aimed at creating mutually beneficial scenarios. Thereby, research on this typology of cooperation is essential for planning for the future of our territories, businesses, and societies. Contextually, examining how the land use has changed in those regions is pivotal to our understanding of this issue.

This Special Issue seeks to present a collection of papers that explore the contribution of land use changes and covers in borderlands and similar territories, such as the so-called ultra-peripheral territories.

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q2 (*Nature and Landscape Conservation*)
