closed (27 November 2023)

Message from the Guest Editors

Dear Colleagues,

This Special Issue intends to discuss the current and potential challenges to sustainably intensify agriculture, and explore innovative approaches to assess such sustainable intensification, as well as best management practices to adapt to climate variability and change. We invite academics and practitioners to contribute reviews, research articles, case studies, or perspectives to this Special Issue.

- soil conservation
- land suitability
- crop yield gaps
- agriculture intensification
- remote sensing
- artificial intelligence

Special Issue

Editor-in-Chief

Prof. Dr. Christine Fürst
Institute for Geosciences and
Geography, Department
Sustainable Landscape
Development, University of Halle,
Von-Seckendorff-Platz 4, 06120
Halle, Germany

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend Land for your best research publications for a fast dissemination of your research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.
Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q2 (*Nature and Landscape Conservation*)
