## In Situ Conservation Tools to Mitigate Impacts from Global Change on Biodiversity

Guest Editors:

**Dr. David Rodríguez-Rodríguez**

European Topic Centre,  
University of Malaga,  
C/Arquitecto Francisco Peñalosa,  
18, 29010 Malaga, Spain

**Dr. Javier Martínez-Vega**

Institute of Economy, Geography  
and Demography, Spanish  
Research Council, C/Albasanz,  
26, 28037 Madrid, Spain

Deadline for manuscript  
submissions:

**28 June 2024**

### Message from the Guest Editors

This Special Issue seeks original contributions on global change pressures on terrestrial protected areas (PAs), PA effectiveness in responding to such pressures and conserving biodiversity, and assessments of other on-site conservation initiatives that can complement PAs and help retain as much biodiversity as possible in the face of global change. Examples of such tools are Other Effective Area-Based Conservation Measures (OECMs), community-conserved areas, areas under land stewardship, or ecological restoration areas/projects.

Authors are encouraged to submit studies on biodiversity assessment outcomes in PAs/OECMs, accurate and innovative site assessment methods, analyses of pressures on PAs/OECMs, threat abatement initiatives, and original proposals for reverting gloomy biodiversity trends focusing on PAs but also on broader in situ landscape conservation, management, or governance approaches such as ecological restoration, OECMs, land stewardship schemes, or indigenous and community conserved areas. National, regional, or global analyses and reviews as well as case studies are particularly welcomed.

## Editor-in-Chief

### **Prof. Dr. Christine Fürst**

Institute for Geosciences and  
Geography, Department  
Sustainable Landscape  
Development, University of Halle,  
Von-Seckendorff-Platz 4, 06120  
Halle, Germany

## Message from the Editor-in-Chief

*Land* is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q2 (*Nature and Landscape Conservation*)
