Message from the Guest Editors

This Special Issue aims to enrich the research of land system science and social-ecological system research by exploring new research in land use and sustainable rural development. Cutting-edge research that advances understanding and analysis of the following issues are welcome: multi-purpose cultivated land utilization, village spatial planning, rural land consolidation, rural land system reform, land and rural poverty, and other land use and rural sustainable development issues. We also welcome articles from interdisciplinary fields essential for land use and rural sustainability, such as how land use enhances carbon neutrality and integrates with environmental sustainability.

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.
