Message from the Guest Editor

This Special Issue intends to shed a light on the extent, development, and consequences of public, semi-public, and non-profit ownership of agricultural land in market economies in urban and rural settings. What is the significance of these types of agricultural land ownership? How do public and semi-public entities behave on agricultural land markets? How do they contract with farmers? Do public, semi-public, or non-profit owners provide more public goods from agricultural lands? We invite scholars from different social science disciplines to contribute reviews, research articles, case studies, or perspectives to this Special Issue.

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.
