Message from the Guest Editors

Infrastructures support and sustain economic and social activities by connecting spatially dispersed areas and facilitating the movement of key economic inputs. All types of infrastructures, such as physical infrastructures (e.g., roads, railways, ports, and bridges), social infrastructures (e.g., educational institutions and facilities supporting health and well-being), and digital infrastructures, play significant roles in creating economic opportunities and can arguably promote economic prosperity. Moreover, infrastructure investments have been commonly used as policy tools to spur economic growth at both national and sub-national scales and boost national, regional, and local economies.

In this Special Issue, we aim to publish scholarly works from around the world that will contribute new knowledge across three broad areas: (a) short- and long-term socio-economic impacts; (b) property market dynamics; (c) new areas of concerns, opportunities, and solutions (e.g., climate change and digitalization).

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q2 (*Nature and Landscape Conservation*)
