Deadline for manuscript
submissions:

30 August 2024

Message from the Guest Editor

Dear Colleagues,

It is critical to elucidate molecular and physiological mechanisms by which metabolic homeostasis is altered with aging in order to improve therapeutic strategies for the elderly. Accumulating evidence suggests that an age-related impairment is postulated to be a mechanism for a decline in stress tolerance observed with aging. In addition, significant progress has been made by demonstrating that metabolic homeostasis and inflammatory response play key roles in age-related cardiovascular and neurovascular diseases and cancer. Identifying good pharmacological approaches on these age-related diseases is an unmet need in the biomedical research field to prevent, delay or reverse the age-related impairments. This Special Issue of *Life* welcomes all related research papers and review articles associated with age-related diseases.

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [CAPus / SciFinder](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Biology*) / CiteScore - Q2 (*Paleontology*)
