Message from the Guest Editors

The purpose of animal production is to produce high-quality animal products efficiently. Currently, poultry nutriology has entered the new stage of the study on precise nutrition supply technologies, including dynamic nutrient requirements, low protein diets, new functional feed additives, etc., which contribute to advance the quality and efficiency of production. Upon nutriology, gastrointestinal and reproductive health is crucial to the quantity and quality of poultry product outputs. Therefore, the research on the theory or nutrition regulation techniques of improving food intake, promoting the development and health of digestive and reproductive tract, and stabilizing intestinal flora have become a hot spot. The goal of the Special Issue, “Interactions between the Poultry Products and Efficient Nutrition Regulation Techniques of Gastrointestinal Tract and Reproductive Tract” is focus on how nutrition regulation techniques interact the output efficiency of poultry products with each other from the perspective of gastrointestinal and reproductive tract health, and the underlying mechanism of their interactions.

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [CAPus / SciFinder](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Biology*) / CiteScore - Q2 (*Paleontology*)
