Italy

Deadline for manuscript  
submissions:

**8 November 2024**

### Message from the Guest Editors

Dear Colleagues,

Translational research aims to bridge the gap between laboratory studies and clinical demands by converting the achievements of basic science into everyday clinical practice. However, the process of transforming research innovations into new health products, as well as diagnostic and therapeutic strategies, remains a major issue of contemporary biomedical medicine. Improvements in the quality of life of cancer patients, pathological pregnancies treatments, drug discoveries, identification of new diagnostic and/or prognostic biomarkers, stem cells applications, discovery of new molecular pathways involved in obstetrics and gynecology pathophysiology as well as automation in assisted reproductive technologies represent only several examples of the clinical application of basic research. This Special Issue aims to collect original papers and innovative review articles detailing the use of basic research in translational research into obstetrics and gynecology in order to assist and support clinical practice in the near future.

Dr. Stefano Canosa

## Message from the Editor-in-Chief

*Life* (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [CAPus / SciFinder](#), [AGRIS](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Biology*) / CiteScore - Q2 (*Paleontology*)
