### Message from the Guest Editors

Dear Colleagues,

The field of cardiology is very dynamic and is constantly evolving and improving. Our knowledge about myocardial ischemia is deepening every day, as major progress is made both in understanding its pathophysiological substrate and in improving diagnostic algorithms and therapeutic protocols.

Myocardial ischemia is the fundamental substrate of acute and chronic coronary syndromes. Beyond this major role, its importance resides in its coexistence with many pathological conditions in which myocardial ischemia appear either as an associated factor or as a consequence.

To summarize, these are the main reasons why we chose this broad topic. Our goal is to form a team of specialists whose advanced experience allows us to understand the complex mechanisms of the bidirectional relationship between myocardial ischemia and various pathologies. Therefore, we invite you to share your knowledge and experience and thus help to identify the best diagnostic and therapeutic solutions for our patients.

Prof. Dr. Irina-Iuliana Costache

## Message from the Editor-in-Chief

*Life* (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [CAPlus / SciFinder](#), [AGRIS](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Biology*) / CiteScore - Q2 (*Paleontology*)
