Planetary Exploration of Habitable Environments

Guest Editors:

Prof. Dr. Dirk Schulze-Makuch

Astrobiology Group, Center for Astronomy and Astrophysics, Technical University Berlin, Berlin, Germany

Dr. Alberto G. Fairén

Centro de Astrobiología, CSIC-INTA, Madrid, Spain; Department of Astronomy, Cornell University, Ithaca, NY, USA

Deadline for manuscript submissions:

closed (15 October 2019)

Message from the Guest Editors

Planetary exploration is moving at a fast pace as we learn about the environmental conditions on various planetary bodies in our solar system and beyond. Habitable conditions, at some time during the history of the solar system, have been proposed to have existed on Mars, Venus, and a number of icy moons of the outer solar system, some of which may still exist today. For this update of the *Life* Special Issue, we particularly encourage submissions describing habitable conditions on planetary bodies, and of how life could have interacted with them, as well as, a description of the analogue environments on Earth from which we can learn about possible adaptations and life strategies on other planets and moons.

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [CAPlus / SciFinder](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Biology*) / CiteScore - Q2 (*Paleontology*)
