Message from the Guest Editor

Cardiovascular disease is the leading cause of death worldwide. In 2016, cardiovascular diseases accounted for 34.2% of all recorded deaths. Ischemic heart disease, stroke, and hypertensive heart disease, despite the progress in diagnostics and therapy, are still significant causes of cardiovascular mortality.

Diagnostic imaging is currently the key diagnostic method for cardiovascular diseases. Echocardiography, Doppler ultrasonography and invasive coronary angiography have been the basis of diagnostic schemes of cardiovascular diseases for many years.

In recent years, we have observed a further increase in the clinical importance of subsequent imaging methods—cardiac computed tomography, cardiac magnetic resonance and CT or MR angiography. It is impossible to imagine modern medicine without the aforementioned diagnostic methods and the perspective of the next few years will only strengthen this tendency.

We invite you to publish original and review articles on the use and importance of cardiovascular imaging in research and clinical practice.

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [CAPus / SciFinder](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Biology*) / CiteScore - Q2 (*Paleontology*)
