### Message from the Guest Editor

“Gut Microbiota: A New Path to Treating Syndromes” is a Special Issue publishing original articles or reviews on all disciplines related to metabolic syndrome and any kinds of syndrome. This includes basic and behavioral sciences, clinical treatment and outcomes, epidemiology, prevention, and public health. The journal should therefore appeal to all professionals with an interest in syndromes and their comorbidities. Article types may include original experiment and reviews, but all must offer new insights, critical or novel perspectives that will enhance the state of knowledge in the field. Prevalence studies that compare (research or review) trends across countries or regions or across ethnic groups or relevant subpopulations and provide novel insights and/or conclusions will be considered. The journal also invites reviews presenting original or challenging theories, hypotheses, or alternative interpretations of findings. The journal will contribute to education and inter-professional developments by planning pro and con reviews on current controversies.
