

## **Data-Driven Fault Diagnosis for Machines and Systems**

Guest Editors:

### **Dr. Ahmed Ragab**

1. Adjunct Professor, Department  
of Mathematics and Industrial  
Engineering, Polytechnique  
Montréal, Montréal, QC H3T 1J4,  
Canada

2. Research Scientist,  
CanmetENERGY-Natural  
Resources Canada, Varennes, QC  
J3X 1P7, Canada

### **Dr. Mouloud Amazouz**

Project Manager,  
CanmetENERGY-Natural  
Resources Canada, Varennes, QC  
J3X 1P7, Canada

Deadline for manuscript  
submissions:

**15 July 2024**

### **Message from the Guest Editors**

The proposed Special Issue aims to cover the latest advancements and challenges in data-driven fault diagnosis and prognosis, including the following:

- Novel approaches for data preprocessing, feature extraction, and feature selection;
- Advanced ML algorithms for fault detection, isolation, and classification;
- Online and real-time fault diagnosis and prognosis techniques;
- Hybrid (physics-based and data-driven) models for fault diagnosis;
- Integration of ML-based fault diagnosis with other smart manufacturing technologies;
- Case studies and applications in different industrial domains such as manufacturing, energy, transportation, and others.

The target audience includes researchers and practitioners in ML, data analytics, industrial engineering, and chemical engineering.

Systems Research Centre,  
University of Beira Interior,  
Calçada Fonte do Lameiro, P -  
6201-001 Covilhã, Portugal

## **Message from the Editor-in-Chief**

*Machines* is an international, peer reviewed journal on machinery and engineering. It publishes research articles, reviews and communications.

Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. Full experimental and/or methodical details must be provided.

There are, in addition, unique features of this journal: Manuscripts regarding research proposals and research ideas will be particularly welcomed; Electronic files or software regarding the full details of the calculation and experimental procedure - if unable to be published in a normal way can be deposited as supplementary material.

## **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within *Scopus*, *SCIE (Web of Science)*, *Inspec*, and other databases.

**Journal Rank:** JCR - Q2 (*Engineering, Mechanical*)
