

## **Design and Application of Advanced Manufacturing Systems**

Guest Editor:

**Prof. Dr. Sever-Gabriel Racz**

Industrial Machines and  
Equipment Department, Faculty  
of Engineering, Lucian Blaga  
University of Sibiu, Sibiu,  
Romania

Deadline for manuscript  
submissions:

**15 January 2024**

### **Message from the Guest Editor**

This Special Issue will focus on new applications and implementations of advanced manufacturing systems, particularly targeting energy efficiency and manufacturing accuracy. Machining operations (cutting, forming, deburring) using industrial robots and how to improve the machining accuracy of the robotic system will be considered as topics of interest. The design of working units (cutting heads or similar) or auxiliary devices designed to increase the number of degrees of freedom for robotic systems (such as rotary tables) will also be included as topics for this Special Issue. Another group of topics will deal with multi-axis machining operations on CNC machine tools. Studies on the machining accuracy and energy efficiency of these operations will be considered. Another area of interest will address hybrid machining, involving both additive and subtractive manufacturing operations. Studies on the design of machining units for hybrid machine tools will also be expected within this theme.

an Open Access Journal by MDPI

## Editor-in-Chief

**Prof. Dr. Antonio J. Marques  
Cardoso**

## Message from the Editor-in-Chief

*Machines* is an international, peer reviewed journal on machinery and engineering. It publishes research articles, reviews and communications.

Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. Full experimental and/or methodical details must be provided.

There are, in addition, unique features of this journal: Manuscripts regarding research proposals and research ideas will be particularly welcomed; Electronic files or software regarding the full details of the calculation and experimental procedure - if unable to be published in a normal way can be deposited as supplementary material.

## Author Benefits

**Open Access:**— free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Inspec, and other databases.

**Journal Rank:** JCR - Q2 (*Engineering, Mechanical*)
