

Advancements in Machines and Power Converters for Renewable Power Generation

Guest Editors:

Dr. John Licari

Department of Electrical Engineering, Faculty of Engineering, University of Malta, MSD 2080 Msida, Malta

Prof. Dr. Michael Galea

Department of Industrial Electrical Power Conversion, University of Malta, MSD 2080 Msida, Malta

Deadline for manuscript submissions:

30 June 2024

Message from the Guest Editors

This Special Issue is intended for researchers and practitioners to share their latest research findings and limitations that can be addressed in future research in machines and power converters for renewable power generation. Research including experimental validation or field testing is highly encouraged for submission. Position papers and state-of-the-art reviews are also welcomed. This Special Issue invites papers that cover topics including but not limited to the following:

- Advances in machine design (power density, efficiency, robustness, etc.);
- Advances in drive and power electronic converter topologies (new, high voltage, efficiency, resilient, fault tolerant, power take-off, etc.);
- Advances in system and component reliability-oriented design aspects;
- Advances in design strategies for applying and implementing technologies across disciplines and/or renewable areas;
- Advances in control strategies (high performance, estimation of non-measurable parameters, mitigation of loads, grid integration and grid support, etc.).

Message from the Editor-in-Chief

Machines is an international, peer reviewed journal on machinery and engineering. It publishes research articles, reviews and communications.

Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. Full experimental and/or methodical details must be provided.

There are, in addition, unique features of this journal: Manuscripts regarding research proposals and research ideas will be particularly welcomed; Electronic files or software regarding the full details of the calculation and experimental procedure - if unable to be published in a normal way can be deposited as supplementary material.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Mechanical*)
