

## **Advances and Applications in Unmanned Aerial Vehicles**

Guest Editors:

**Dr. Octavio Garcia-Salazar**

Aerospace Engineering Research  
and Innovation Center, Faculty of  
Mechanical and Electrical  
Engineering, Autonomous  
University of Nuevo Leon,  
Apodaca, Mexico

**Dr. Anand Sanchez-Orta**

Robotics and Advanced  
Manufacturing Division,  
CINVESTAV, Saltillo, Coahuila,  
Mexico

**Dr. Aldo Jonathan Muñoz-  
Vazquez**

Department of Multidisciplinary  
Engineering, Texas A&M  
University, 6200 Tres Lagos Blvd,  
Higher Education Center at  
McAllen, McAllen, TX 78504, USA

Deadline for manuscript  
submissions:

**31 May 2024**

### **Message from the Guest Editors**

The objective of this Special Issue is to address the recent advances and applications in unmanned aerial vehicles, considering both theory and experiments for fixed-wing, multirotor, and non-conventional (convertible) vehicles. Manuscripts related but not limited to virtual simulations, computational fluid dynamics (CFD), wind tunnel testing, and ground testing of UAVs are welcome. We invite researchers and engineers to contribute their original unpublished works, focusing on (but not limited to) the topics listed below:

- Modeling and simulation
- Design and development
- Guidance, navigation, and control (GNC)
- Formation flight and coordination of multiple UAVs
- Path planning
- Sensing and avoiding algorithms
- Artificial intelligence for UAVs
- Convertible UAVs (non-conventional configurations)
- Real-time autopilots and embedded control for UAVs
- Real-time applications: agriculture, infrastructure and mining

an Open Access Journal by MDPI

## **Message from the Editor-in-Chief**

*Machines* is an international, peer reviewed journal on machinery and engineering. It publishes research articles, reviews and communications.

Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. Full experimental and/or methodical details must be provided.

There are, in addition, unique features of this journal: Manuscripts regarding research proposals and research ideas will be particularly welcomed; Electronic files or software regarding the full details of the calculation and experimental procedure - if unable to be published in a normal way can be deposited as supplementary material.

## **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within *Scopus*, *SCIE (Web of Science)*, *Inspec*, and other databases.

**Journal Rank:** JCR - Q2 (*Engineering, Mechanical*)
