

Condition Monitoring and Fault Diagnosis of Induction Motors

Guest Editors:

Dr. Ioannis D. Chasiotis

Electrical Machines Laboratory,
Department of Electrical &
Computer Engineering,
Democritus University of Thrace,
University Campus, Kimmeria,
GR-671 00 Xanthi, Greece

Prof. Dr. Yannis L. Karnavas

Electrical Machines Laboratory,
Department of Electrical &
Computer Engineering,
Democritus University of Thrace,
University Campus, GR-671 00
Xanthi, Greece

Deadline for manuscript
submissions:

30 April 2024

Message from the Guest Editors

Topics of interest include but are not limited to the following:

- Predictive maintenance and real-time condition monitoring systems;
- On-line and remote location monitoring technologies;
- Non-invasive techniques for data acquisition;
- Robust methodologies for measurement, testing and diagnostics;
- Modern methods for signal processing;
- Enhanced pattern recognition algorithms;
- Failure mechanism analysis;
- Induction motors' remaining useful life prediction;
- Diagnostic approaches for all types of faults (i.e., mechanical, electrical, electromechanical, incipient, multiple simultaneous faults, etc.);
- Advanced artificial intelligence based fault diagnosis methods

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Machines is an international, peer reviewed journal on machinery and engineering. It publishes research articles, reviews and communications.

Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. Full experimental and/or methodical details must be provided.

There are, in addition, unique features of this journal: Manuscripts regarding research proposals and research ideas will be particularly welcomed; Electronic files or software regarding the full details of the calculation and experimental procedure - if unable to be published in a normal way can be deposited as supplementary material.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within *Scopus*, *SCIE (Web of Science)*, *Inspec*, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Mechanical*)
