

High Performance and Hybrid Manufacturing Processes

Guest Editor:

Dr. Ali Abdelhafeez Hassan

Lecturer in Mechanical
Engineering, Teesside University,
Middlesbrough TS1 3BX, UK

Deadline for manuscript
submissions:

closed (30 April 2024)

Message from the Guest Editor

This is a call for papers for the Special Issue “High-Performance and Hybrid Machining Processes”. This Special Issue will provide a venue for scholars and researchers to share their most recent theoretical and technical successes as well as to highlight key topics and difficulties for future study in the field. The submitted papers are expected to raise original ideas and potential contributions to theory and practice. Topics of interest include but are not limited to:

- High-performance and hybrid machining operations.
- Hybrid machining operations for enhanced product precision and integrity.
- Process monitoring and control techniques to achieve improved performance.
- Product surface/subsurface integrity following high-performance and hybrid machining.
- Simulation of high-performance and hybrid machining operations.

Message from the Editor-in-Chief

Machines is an international, peer reviewed journal on machinery and engineering. It publishes research articles, reviews and communications.

Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. Full experimental and/or methodical details must be provided.

There are, in addition, unique features of this journal: Manuscripts regarding research proposals and research ideas will be particularly welcomed; Electronic files or software regarding the full details of the calculation and experimental procedure - if unable to be published in a normal way can be deposited as supplementary material.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within *Scopus*, *SCIE (Web of Science)*, *Inspec*, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Mechanical*)
