Message from the Guest Editor

Dear Colleagues,

This Special Issue of *Marine Drugs*, entitled “Marine Cosmeceuticals”, aims to collect papers containing up-to-date information regarding the historical and potential use of marine resources, their secondary metabolites, as well as their overall molecular constituents.

Marine organisms constitute an important source of bioactive compounds, including proteins and peptides, polysaccharides, polyphenols, pigments, and mycosporine-like amino acids, among others, that are of a great interest to the cosmetics industry.

This Special Issue will cover all the most recent advances in the field of marine resources research and discuss how these approaches contribute to defining innovative trends in marine cosmeceuticals formulations.

Dr. Jose Luis Legido

Message from the Editor-in-Chief

During the past few decades there has been an ever increasing number of novel compounds discovered in the marine environment. This is exemplified by the robust preclinical and clinical pipeline that currently exists for marine natural products. *Marine Drugs* is inviting contributions on new advances in marine biotechnology, pharmacology, chemical ecology, synthetic biology, and genomics approaches related to the discovery of therapeutically relevant marine natural products. Our goal is to share your contribution in a timely fashion and in a manner that will be valued by the scientific community.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Embase](#), [PubAg](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q1 (*Pharmacology & Pharmacy*) / CiteScore - Q1 (*Pharmacology, Toxicology and Pharmaceutics (miscellaneous)*)
