Message from the Guest Editor

Dear Colleagues,

This Special Issue “Marine-Derived Ingredients for Cosmeceuticals ” will collect papers on up-to-date information regarding the historical and potential use of marine resources, their secondary metabolites, and molecular constituents for formulating cosmetics and personal care products.

A plethora of physicochemicals and biological activities, including antimicrobial, emulsifiers, stabilizers, thickeners and gelling agents, radical scavenging and antioxidant activity, and UV filters, make marine organisms interesting sources of ingredients for the cosmetics industry.

This Special Issue will cover all the most recent advances in the field of marine resources research and how these approaches are contributing to defining innovative trends in marine cosmetic products formulation.

Prof. Dr. Laurence J M Coiffard

Message from the Editor-in-Chief

During the past few decades there has been an ever increasing number of novel compounds discovered in the marine environment. This is exemplified by the robust preclinical and clinical pipeline that currently exists for marine natural products. *Marine Drugs* is inviting contributions on new advances in marine biotechnology, pharmacology, chemical ecology, synthetic biology, and genomics approaches related to the discovery of therapeutically relevant marine natural products. Our goal is to share your contribution in a timely fashion and in a manner that will be valued by the scientific community.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Embase](#), [PubAg](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q1 (*Pharmacology & Pharmacy*) / CiteScore - Q1 (*Pharmacology, Toxicology and Pharmaceutics (miscellaneous)*)
