### Message from the Guest Editors

Dear Colleagues,

This Special Issue is dedicated to the memory of Professor Paul J. Scheuer (1915–2003). In his more than fifty years at the University of Hawaii, Paul pioneered in marine toxin discovery and marine chemical ecological research, co-funded the modern marine natural product chemistry, authored over 300 scientific papers, and edited books inspiring many marine chemists and biologists. We invite those who knew Paul, those who were inspired by him, and others who want to commemorate his life's work to contribute to this Special Issue.

## Message from the Editor-in-Chief

During the past few decades there has been an ever increasing number of novel compounds discovered in the marine environment. This is exemplified by the robust preclinical and clinical pipeline that currently exists for marine natural products. *Marine Drugs* is inviting contributions on new advances in marine biotechnology, pharmacology, chemical ecology, synthetic biology, and genomics approaches related to the discovery of therapeutically relevant marine natural products. Our goal is to share your contribution in a timely fashion and in a manner that will be valued by the scientific community.

## Author Benefits

**Open Access:**— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.
