Santé (SIMoS), Université Paris-
Saclay, Bâtiment 152, rue de la
Biologie, Point courrier 24, F-
91191 Gif sur Yvette, France

Deadline for manuscript
submissions:

30 June 2024

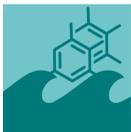

Message from the Guest Editor

In this new Special Issue of “Marine Biotoxins 3.0”, we welcome manuscripts dealing with microorganisms involved in the production of marine biotoxins (bacteria, cyanobacteria, dinoflagellates, diatoms, and fungi), the environmental factors favoring their proliferation, and their vectorial transfer through the marine food web. The transfer of marine biotoxins to invertebrates, fish, birds, and marine mammals constitutes a menace for wildlife. Some marine biotoxins definitely constitute a threat for human consumers of contaminated shellfish and fish, and regulatory limits need to be evaluated and discussed in order to set risk factors. Most marine biotoxins belong to different families of organic molecules, with diverse and rich chemical structures, and new biotoxins are described every year. The better we know the cellular and molecular target(s), signaling pathways and mechanism(s) used by marine biotoxins to exert their toxic activities, the more possibilities we will have to find putative antagonists or effective countermeasures.

Message from the Editor-in-Chief

During the past few decades there has been an ever increasing number of novel compounds discovered in the marine environment. This is exemplified by the robust preclinical and clinical pipeline that currently exists for marine natural products. *Marine Drugs* is inviting contributions on new advances in marine biotechnology, pharmacology, chemical ecology, synthetic biology, and genomics approaches related to the discovery of therapeutically relevant marine natural products. Our goal is to share your contribution in a timely fashion and in a manner that will be valued by the scientific community.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Embase](#), [PubAg](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q1 (*Pharmacology & Pharmacy*) / CiteScore - Q1 (*Pharmacology, Toxicology and Pharmaceutics (miscellaneous)*)
