Message from the Guest Editor

Dear Colleagues,

We are thrilled to introduce the new Special Issue "Microstructural, Electrical and Mechanical Characterization of Nanocomposites" in MDPI journal *Materials*. As Guest Editors, our primary aim is to delve into the recent innovations and burgeoning trends within the realm of nanocomposites.

The Issue encapsulates diverse topics such as:

1. Mechanical behavior and peak hardness of nanocomposites.
2. Effects of microstructural alterations on nanocomposite properties.
3. Nanocomposites' compressive yield strengths and textures.
4. High-precision characterization of mechanical attributes.
5. Influence of crystallinity on nanocomposite performance.
6. Implications of nanocomposites' impact behaviors.
7. Biomedical applications of nanocomposite materials.
8. Data mining in the context of nanocomposite research.

We welcome contributions that touch upon these themes or related fields. Authors are invited to submit their groundbreaking research findings, novel methodologies, theoretical studies, and experimental investigations. Original research papers, reviews, and commentaries are

Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada

2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank: JCR - Q2 (*Metallurgy & Metallurgical Engineering*) / CiteScore - Q2 (*Condensed Matter Physics*)

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.
