Advances in Materials, Devices and Applications of Superconducting Technology

Guest Editors:

Dr. Peifeng Gao

College of Civil Engineering and
Mechanics, Lanzhou University,
Lanzhou 730000, China

Dr. Ying Xu

State Key Laboratory of
Advanced Electromagnetic
Engineering and Technology,
School of Electrical and
Electronic Engineering,
Huazhong University of Science
and Technology, Wuhan 430074,
China

Deadline for manuscript
submissions:

closed (20 November 2023)

Message from the Guest Editors

Superconducting materials hold great potential in bringing radical changes for high-energy and high-field applications such as superconducting magnets, superconducting generators and motors, superconducting cables for power transmission, superconducting fault current limiter, and superconducting magnetic energy storage. It is necessary to elucidate the challenges and benefits of various types of superconducting materials and applications.

This Special Issue on “Advances in Materials, Devices and Applications of Superconducting Technology” will address the novel techniques, theories, and concepts for the research progress in superconducting materials, devices, and applications. Full articles, short communications, and review papers on theoretical modeling, numerical simulation, and experimental characterization are welcome for submission. Topics of interest include but are not limited to the following:

Superconducting materials;

Large-scale applications and superconducting power devices;

Mechanical, electromagnetic, and thermal stability.

Editor-in-Chief

Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada

2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank: JCR - Q2 (*Metallurgy & Metallurgical Engineering*) / CiteScore - Q2 (*Condensed Matter Physics*)
