Deadline for manuscript submissions:
closed (20 January 2024)

Message from the Guest Editors

Dear Colleagues,

The corrosion resistance of materials is an extremely important performance parameters when applied in the harsh service environment, especially in coastal environments. Metal materials are prone to losing electrons due to their high activity, leading to corrosion. In order to prevent metal corrosion, some necessary key protective measures need to be taken. A rust inhibitor is usually added to achieve the purpose of corrosion prevention in metal composite materials. Moreover, electroplating and cathodic protection are also applied for corrosion prevention of metals. Additionally, some evaluation methods of corrosion degree are also commonly used. Evaluation methods, such as electrical parameter method, mass loss method, and microscopic analysis method, are effective to quantitatively analyze the corrosion degree.

Editor-in-Chief

Prof. Dr. Maryam Tabrizian
James McGill Professor, Professor of Biomedical Engineering, Professor of Bioengineering, Professor of Experimental Surgery, Department of Biomedical Engineering, Faculty of Medicine/Faculty of Dentistry, McGill University, Duff Medical Science Building, 3775 University Street, Montreal, QC H3A 2B4, Canada

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.
Journal Rank: JCR - Q2 (*Metallurgy & Metallurgical Engineering*) / CiteScore - Q2 (*Condensed Matter Physics*)
