### Message from the Guest Editors

Dear Colleagues,

In recent decades, fiber-reinforced polymer (FRP) composites have been increasingly adopted in the field of engineering to achieve a reduced weight, a prolonged service life, or improved structural performance. Applications of FRP composites mainly lie in their advantages of high strength- and stiffness-to-weight ratios, superior corrosion resistance, excellent fatigue performance, etc. FRP composites can be manufactured through various techniques depending on the desired mechanical properties and geometries, and the most common techniques include pultrusion, filament winding, vacuum-assisted resin transfer molding, compression molding, wet lay-up, etc.

This Special Issue is seeking research on the mechanical properties and manufacturing techniques of FRP composites. To align with the scope of the journal, only research on materials for engineering is welcome.

Dr. Tian-Qiao Liu

## Message from the Editor-in-Chief

*Materials* (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

**Journal Rank:** JCR - Q2 (*Metallurgy & Metallurgical Engineering*) / CiteScore - Q2 (*Condensed Matter Physics*)
