### Message from the Guest Editors

Dear Colleagues,

Road infrastructure needs to establish that roads are in good technical condition and ensure the safety and comfort for users. Premature road infrastructure damage is disadvantageous due to technical, economic and transport sustainable factors, and contributes to more frequent maintenance and rehabilitation. From this reason, this Special Issue aims to collect the latest achievements in the field of materials used for road construction, which makes roads more durable, safe and which reduces adverse effects of road transport on environment.
