Department of Mechanical and
Aerospace Engineering, Sapienza
University of Rome, Via
Eudossiana, 18, 00184 Rome,
Italy

Dr. Bappa Acherjee

Department of Production and
Industrial Engineering, Birla
Institute of Technology: Mesra,
Ranchi 835215, India

Deadline for manuscript
submissions:

10 September 2024

Message from the Guest Editors

Laser processing has emerged as a promising method for joining, modifying or enhancing the performance of polymers due to its precision, non-contact nature and ability to induce localized changes.

Significant advancements have been made through the use of Laser Transmission Welding (LTW): this process allows for the precise control of heat distribution and enables the welding of complex geometries with minimal thermal damage. Laser transmission welding offers advantages such as high joint strength, excellent sealing properties and the ability to join dissimilar materials. It has been applied in industries such as automotives, medical devices, food packaging and electronics, where the demand for reliable and aesthetically pleasing polymer joints is high. Finally, Laser-Based Additive Manufacturing has revolutionized the production of polymeric components with complex geometries. By selectively curing or melting polymer layers, intricate structures can be created with tailored mechanical properties, including improved strength, flexibility and biocompatibility.

Editor-in-Chief

Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada

2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank: JCR - Q2 (*Metallurgy & Metallurgical Engineering*) / CiteScore - Q2 (*Condensed Matter Physics*)
