Key Laboratory of Advanced  
Technologies of Materials,  
Ministry of Education, School of  
Materials Science and  
Engineering, Southwest Jiaotong  
University, Chengdu, 610031,  
China

Deadline for manuscript  
submissions:

**closed (31 December 2019)**

Electricity is a noble form of energy, which enables energy saving materials processing (sintering, joining, synthesis and forming). Since the discovery of Joule effect in 1843, researchers working on field-assisted techniques realized that by passing a current across a material it could lead to “something special” not seen otherwise. That “something special” found little use for more than 150 years because of poor controls over the processing parameters. Nowadays, even if these issues have been surpassed, there is still a lot unknown about the interaction between matter and intense electric fields at high temperature ( $T > 0.4 T_m$ ). The special issue invites submissions on aspects of material processing where the use of an electrical field plays a key role in the triangle properties-microstructure-processing.

It is my pleasure to invite you to submit a manuscript for this Special Issue. Full papers, communications, and reviews are all welcome.

Prof. Dr. Salvatore Grasso

# Special Issue

an Open Access Journal by MDPI

## Editor-in-Chief

### Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada

2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

## Message from the Editor-in-Chief

*Materials* (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

**Journal Rank:** JCR - Q2 (*Metallurgy & Metallurgical Engineering*) / CiteScore - Q2 (*Condensed Matter Physics*)
