## Dental Implants and Materials

Guest Editors:

**Prof. Dr. Marco Tallarico**

Department of Medicine, Surgery,  
and Pharmacy, University of  
Sassari, 07021 Sassari, Italy

**Prof. Dr. Marco Cicciu**

Department of General Surgery  
and Surgical-Medical Specialties,  
University of Catania, Via S. Sofia  
78, 95124 Catania, Italy

Deadline for manuscript  
submissions:

**closed (31 December 2020)**

### Message from the Guest Editors

Since their introduction by Prof. Branemark in the 1960s, dental implants have become a reliable treatment option for the replacement of missing teeth in both partial and complete edentulous patients. Survival and success rates of implant-supported protheses depend on several factors, including physical and chemical properties of implant materials, such as microstructure, its surface composition and characteristics, as well as design factors. In recent years, the digital revolution has been changing the world, and dentistry is no exception. The introduction of new aesthetic materials, together with a whole range of digital devices (intraoral, extraoral, face scanners and cone beam computed tomography scans), processing software, and powerful manufacturing and prototyping tools (milling machines and 3D printers) are radically transforming the dental profession. In this vision, modern digital dentistry is changing workflows and, consequently, operating procedures.

an Open Access Journal by MDPI

## Editor-in-Chief

### Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada

2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

## Message from the Editor-in-Chief

*Materials* (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

**Journal Rank:** JCR - Q2 (*Metallurgy & Metallurgical Engineering*) / CiteScore - Q2 (*Condensed Matter Physics*)
