Novel Materials and Technologies for the Urban Roads of the Future

Guest Editors:

Dr. Cesare Sangiorgi
Department of Civil, Chemical, Environmental, and Materials Engineering, University of Bologna, 40131 Bologna, Italy

Prof. Dr. Daniel Fresno Castro
GITECO Research Group, University of Cantabria, Santander, Spain

Dr. Piergiorgio Tataranni
Department of Civil, Chemical, Environmental and Materials Engineering, University of Bologna, 40131 Bologna, Italy

Deadline for manuscript submissions:
closed (31 August 2020)

Message from the Guest Editors

Growing unsustainable urbanization and intensified land-use are generating new urban scenarios for the built environment and causing the urgent need for novel and synergic approaches to the design, construction, and maintenance of existing and new urban road pavements. The development of sustainable, durable, smart, and functional materials is the new challenge that researchers all over the world are facing in order to tackle the aforementioned needs. Paving solutions for the urban roads of the future must have consistent properties, balancing the production and maintenance costs, as suggested by the circular economy concept, without jeopardizing the service performances.This Special Issue will present the latest trends of research in the pavement engineering sector, focusing on the development of innovative materials and technologies for the conception of a new urban environment. The editors welcome the submission of high-quality research, technical papers, review contributions, and case histories on laboratory and in-situ applications.

Editor-in-Chief

Prof. Dr. Maryam Tabrizian
1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada
2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.
Journal Rank: JCR - Q2 (*Metallurgy & Metallurgical Engineering*) / CiteScore - Q2 (*Condensed Matter Physics*)
