

## Complex Analysis and Geometric Function Theory

Guest Editor:

**Prof. Dr. Teodor Bulboacă**

Faculty of Mathematics and  
Computer Science, Babeş-Bolyai  
University, 400084 Cluj-Napoca,  
Romania

Deadline for manuscript  
submissions:

**closed (31 January 2023)**

### Message from the Guest Editor

The Special Issue *Complex Analysis and Geometric Function Theory* endeavors to publish research papers of the highest quality with an appeal for specialists in the field of complex analysis and geometric aspects of complex analysis, and to the broad mathematical community. We hope that the distinctive aspects of the Issue will bring the reader close to the subject of current research and leave the way open for a more direct and less ambivalent approach to the topic.

Our goal is to invite the authors to present their original articles, as well as review articles, that will stimulate the continuing efforts in developing new results in these areas of interest. We would hope that this Special Issue will have a great impact on other people in their efforts to broaden their knowledge and investigation and help the researchers to summarize the most recent developments and ideas in these fields.

This Special Issue will invite the authors to present their original articles that provide not only new results or methods but may have a great impact on other people in their efforts to broaden their knowledge and investigation.

## Editor-in-Chief

### **Prof. Dr. Francisco Chiclana**

School of Computer Science and  
Informatics, De Montfort  
University, The Gateway,  
Leicester LE1 9BH, UK

## Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.

**Journal Rank:** JCR - Q1 (*Mathematics*) / CiteScore - Q1 (*General Mathematics*)
