Artificial Intelligence Head,  
Laboratory of Data Analysis and  
Bioinformatics, Innopolis  
University, 420500 Innopolis,  
Russia

Deadline for manuscript  
submissions:

**closed (30 April 2023)**

### Message from the Guest Editor

Transport problems of modern metropolises are well known and particularly important. Emerging road traffic tasks require complex solutions and application of various classes of mathematical models due to the wide variety of timescales associated with the processes in the urban transportation system.

The describing of such models and algorithms is the main goal of this issue. The issue will focus on the numerical algorithms of transport modeling which can be explored theoretically or be developed for practical applications.

School of Computer Science and  
Informatics, De Montfort  
University, The Gateway,  
Leicester LE1 9BH, UK

## Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.

**Journal Rank:** JCR - Q1 (*Mathematics*) / CiteScore - Q1 (*General Mathematics*)
