## Message from the Guest Editors

Dear Colleagues,

This special issue is intended to collect recent advances in this area. The topics of interest for the special issue include, but are not limited to, NUMERICAL METHODS FOR SOLVING:

- Nonlinear differential equations.
- Nonlinear integral equations.
- Nonlinear integro-differential equations.
- Nonlinear variational equations.
- Nonlinear optimization problems.
- Nonlinear control problems.
- Equilibrium problems.
- Nonlinear algebraic equations.

In addition to all this, their applications to real-world are also especially welcome.

## Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.
**High Visibility:** indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.
**Journal Rank:** JCR - Q1 (*Mathematics*) / CiteScore - Q1 (*General Mathematics*)
