Engineering and Management,
National Taipei University of
Technology, Taipei 106, Taiwan

Deadline for manuscript
submissions:

31 October 2024

Message from the Guest Editors

Dear Colleagues,

We welcome the submission of research publications that delve into the mathematical foundations of network reliability, offering novel methodologies and models for assessing and improving the robustness of industrial systems. We also welcome submissions in the form of works that explore mathematical optimization techniques to enhance decision-making processes, cost efficiency, and resource allocation in industrial settings. We aim to bring together mathematical rigor and real-world relevance, fostering discussions that advance the field of industrial engineering and management, making it more resilient and effective. This Special Issue will cover a wide range of topics, including but not limited to the following:

- Network reliability analysis and modeling;
- The optimization of industrial engineering in network analysis;
- Reliability-centered maintenance;
- Resilience analysis in practical systems;
- Multi-objective optimization in industrial engineering with reliability;
- Machine Learning (ML) and optimization in industrial engineering and management;
- Sustainability and green operations in networks;
- Supply chain management in network reliability.

Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.

Journal Rank: JCR - Q1 (*Mathematics*) / CiteScore - Q1 (*General Mathematics*)
