

Computational Methods and Data-Driven Models in Operations Research

Guest Editors:

**Prof. Dr. Mirjana Kljajić
Borštnar**

Faculty of Organizational
Sciences, University of Maribor,
4000 Kranj, Slovenia

Prof. Dr. Črtomir Rozman

Faculty of Agriculture and Life
Sciences, University of Maribor,
Pivola 10, 2311 Hoče, Slovenia

Deadline for manuscript
submissions:

closed (30 April 2024)

Message from the Guest Editors

The title of this Special Issue not only reflects the topicality of the Special Issue itself but also provides a direct link to the 17th International Symposium on Operations Research in Slovenia, which will be held on 20–22 September 2023 at Hotel Astoria, Bled, Slovenia. The conference SOR is the premiere scientific event in the area of operations research and has a long tradition of providing an international forum for scientific exchange at the frontiers of operations research (OR) in mathematics, statistics, economics, engineering, education, environment, computer science, etc. OR comprises a large variety of mathematical, statistical and informational theories and methods to analyse complex situations and contribute to responsible decision-making, planning and the efficient use of resources. We believe in a world of increasing complexity and scarce natural resources, there will be a growing need for such approaches in many fields.

We want to invite authors to submit an extended version of their conference papers for this Special Issue. However, the Special Issue is also open to submissions from authors who are interested even if have not attended the SOR.

Editor-in-Chief

Prof. Dr. Francisco Chiclana

School of Computer Science and
Informatics, De Montfort
University, The Gateway,
Leicester LE1 9BH, UK

Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.

Journal Rank: JCR - Q1 (*Mathematics*) / CiteScore - Q1 (*General Mathematics*)
