Message from the Guest Editors

Dear Colleagues,

Nowadays, uncertainty theory has become a new branch of mathematics for modeling indeterminate phenomena, based on normality, duality, subadditivity, and product axioms. It has been applied to analyze uncertain optimization, uncertain games, uncertain differential games, and uncertain finance, etc.

The aim of this Special Issue is to attract leading researchers in these areas, in order to collate the recent advances in uncertain optimization and games, from both a theoretical and an applied point of view. All articles related to uncertain optimization and games are invited for submission for inclusion in this Special Issue.

Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.

Journal Rank: JCR - Q1 (*Mathematics*) / CiteScore - Q1 (*General Mathematics*)
