submissions:

closed (30 September 2021)

Message from the Guest Editors

Dear Colleagues,

The modeling and control of nonlinear dynamic systems is still a challenging problem in mathematics and engineering. Despite much investigation being carried out so far, nonlinear and complex phenomena are not yet fully understood, due to their considerable randomness and a diversity of reasons underlying the energy dissipation involving the dynamic effects. In fact, the present knowledge and scientific tools are still far from capturing the overall richness of the system dynamics.

This Special Issue focuses on the modeling and control of nonlinear dynamic systems. Manuscripts on nonlinear dynamics, advanced control systems, complex dynamics, fractional calculus and its applications, fractals and chaos, multibody systems, robotics, and modelling, among others, are welcome.

The Special Issue will bring together contributions from researchers in different topics of engineering, mathematics, physics, biology, geophysics, and other sciences. Papers describing original theoretical research as well as new experimental results are expected.

Editor-in-Chief

Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.

Journal Rank: JCR - Q1 (*Mathematics*) / CiteScore - Q1 (*General Mathematics*)
